CYBERNETICS

A translation of *Kibernetika*

Volume 5, Numbers 1-2 January-April, 1969

CONTENTS

Eng./Russ.

VOLUME 5, NUMBER 1, JANUARY-FEBRUARY, 1969

	Eng.	Russ.
Events Representable in Push-Down Automata—A. A. Letichevskii	1	1
Criteria for the Representation of Events in Finite Probabilistic Automata. I —R. G. Bukharaev	8	8
Algebras of Periodically Defined Transformations of an Infinite Register —V. G. Bodnarchuk and G. E. Tseitlin	20	18
Determination of the Set of Essential Paths in a Stochastic Graph. I — I. G. Kolosovskii	33	28
Method of Synthesis of a Class of Circuits Based on Functional Separability — V. P. Vashchenko	37	32
Arithmetical Operations on Numbers of Arbitrary Length and Arbitrary Range. II — A. A. Dorodnitsyna	48	41
A Method for Improving the Efficiency of External Sorting Algorithms Using the Distribution Method — B. B. Timofeev and V. A. Litvinov	58	50
Mathematical Simulation with a Hybrid Computer — B. N. Malinovskii and N. Rabedzhanov	62	53
Method of Generating Pseudorandom Functions with Prescribed Characteristics — A. Ya. Shpil'berg, E. M. Lyakhovitskii, and G. K. Kladov	67	58
The Problem of Syntactic Analysis of Languages. I — V. N. Red'ko	72	61
Computation of Ergodic Distribution of Markov and Semi-Markov Processes — A. A. Tomusyak	80	68
A Method of Controlling a Poisson Process Subject to Shift — N. V. Andreev and V. S. Korolyuk	85	72
The Distribution of the Number of Observations in the Sequential Analysis of a Sequence of Independent Random Quantities — O. A. Khokhel	89	75
The Length of a Circuit in a Strongly Connected Graph — V. G. Vizing and M. K. Gol'dberg	95	79
Differentially Extremal Equations — A. N. Lavapunov	99	83
A Mathematical Model and an Algorithm for Determining the Hydration Boundaries of Biopolymers in Solutions — L. G. Sedykh	108	90
Applicability of Certain Algorithms to Efficiency Checks and Equipment Inspection — A. M. Bonch-Bruevich, N. T. Milokhin, and G. P. Shibanov	113	95
BRIEF COMMUNICATIONS		
The Problem of Estimating the Length of a Microprogram in a Microprogram Algebra — Yu. A. Kapitonova	120	101
Solution of the Guillotine Cutting Problem by the Method of Processing a List of States — I. V. Romanovskii	123	102

CONTENTS

(continued)

Engl./Russ.

VOLUME 5, NUMBER 2, MARCH-APRIL, 1969

Prediction Based on Expert Opinions—V. M. Glushkov	127	2
Functional Equivalence of Discrete Processors. I—A. A. Letichevskii	130	5
Range and Degree of Realizability of Formulas in the Restricted Predicate Calculus —Yu. V. Glebskii, D. I. Kogan, M. I. Liogon'kii, and V. A. Talanov	142	17
The Problem of Equivalence in the Class of φ-Complexes—V. I. Malinovskii	155	28
Representations in Many-Valued Logics—Yu. L. Ivas'kiv, D. A. Pospelov, and Zh. Toshich	163	35
Hybrid-Computer Solution of Finite Equations—G. E. Pukhov	178	48
An Algorithm for Simulating the Statistical Dynamics of Industrial Systems with Variable Structure—T. F. Suprun	185	54
A Majority Operation in Many-Valued Logic—V. I. Varshavskii	198	64
On an Application of Planar Graphs—Yu. A. Sushkov	203	68
On the Method of Generalized Stochastic Gradients and Stochastic Quasi-Féjer Sequences—Yu. M. Ermol'ev	208	73
Features of Problems in the Optimization of the Characteristics of Aircraft and Spacecraft with Respect to Cost Effectiveness—A. I. Egorov	221	84
Necessary Conditions for an Extremum in Partially Convex Programming Problems —B. N. Pshenichnyi	227	90
One Class of Immediate-Constituent Grammars—L. G. Samoilenko	232	94
BRIEF COMMUNICATIONS		
On a Problem Posed by V. M. Glushkov—M. I. Kratko and G. S. Plesnevich	236	97
On a Note by A. C. Fleck—M. A. Spivak	237	97
One Problem in Economics—V. K. Leont'ev	238	98
On the Solution of a Class of Problems in Integer Linear Programming—V. A. Trubin	241	100

The Russian press dates (podpisano k pechati) of the first and second issues covered in this issue of the translation were, respectively, 2/7/1969 and 4/7/1969. Publication of the material translated in this issue is therefore known to have occurred not prior to the earlier of these dates, but must be assumed to have taken place in two parts, the second being published shortly after the later of the dates.

CYBERNETICS

A translation of *Kibernetika*

Volume 5, Number 3 May-June, 1969

CONTENTS

	Eng./Russ.	
Galois Theory for Post Algebras. I – V. G. Bodnarchuk, L. A. Kaluzhnin, V. N. Kotov, and B. A. Romov	243	1
A Class of Linear Automata on Graphs – A. G. Rutkas and D. M. Chausovskii	253	11
The Number of Connected Initial Automata – V. A. Liskovets	259	16
The Decomposition of Abstract Automata – A. N. Melikhov, L. S. Bershtein, and V. P. Karelin	263	20
Determination of a Set of Essential Paths in a Stochastic Graph. II – I. G. Kolosovskii.	270	27
A Method of Taking the Delay of a Digital Automaton of a Quasianalog Hybrid Computing System into Account in Solving Ordinary Differential Equations – G. E Pukhov	277	34
Analyzing the Effect of Noise on the Performance of a Closed-Loop Automatic Control System – L. L. Voznyuk and V. I. Ivanenko	281	37
A Method for Constructing a Process for Calculating Successive Interpolations on Digital Integrators – O. N. P'yavchenko	285	40
Periodic Preventive Maintenance with Geometrically Distributed Displacement Frequency – E. P. Lebedintseva	289	43
A Problem in the Long-Term Planning of an Airline Fleet – S. N. Kochura and G. N. Yun	293	46
Minimization of Many-Valued Functions in a System That Includes all One-Place Functions – A. M. Romankevich	297	49
On the Problem of Syntactic Analysis of Languages. II – V. N. Red'ko	300	52
The Refal Language and Its Use in Transforming Algebraic Expressions – V. F. Turchin and V. I. Serdobol'skii	307	58
Some Limit Theorems for Functionals of Sums of Random Values Governed by a Markov Chain – I. I. Ezhov and G. I. Prizva	313	63
An Algorithm for Solving a Class of Problems in Linear Programming with Boolean Variables – A. V. Krushevskii, R. A. Polyak, and M. E. Primak	319	68
The m-Machine Problem (m > 2) – V. Ya. Burdyuk	326	74
The Densest Coverage of a Strip by Figures of Complex Geometrical Shape. II – A. G. Glushko, V. L. Rvachev, and Yu. G. Stoyan	330	77
Differentiability of a Functional of a Programming Problem in an Infinite-Dimensional Space – A. I. Sotskov	334	81
The Application of Convex Programming to the Solution of Problems in Chebyshev Approximation – L. I. Avdeeva	343	89
BRIEF COMMUNICATIONS		
Analysis of a Time-Sharing System with Users of the Same Type – G. T. Artamonov and Yu. A. Mikheev	349	94
An Urban-Transportation Optimization Problem – É. I. Ustinova	354	97

The Russian press date (podpisano k pechati) of this issue was 6/6/1969. Publication therefore did not occur prior to this date, but must be assumed to have taken place reasonably soon thereafter.

CYBERNETICS

A translation of *Kibernetika*

Volume 5, Number 4 July-August, 1969

CONTENTS

	Eng./Russ.
A Comparison of the Complexity of the Longest and Shortest Disjunctive Normal Forms and a Lower Bound for the Number of Prime Disjunctive Normal Forms for Almost All Boolean Functions—A. D. Korshunov	357 1
Time-Optimization of Operator Schemes—I. G. Kolosovskii	370 12
On Formal Synthesis of a Grouped Automaton—A. T. Mishchenko	376 17
The Coding of Abstract Automata by Normal Codes. II—É. A. Vartapetov	381 21
Representability in Deterministic Multi-Tape Automata—A. Ya. Makarevskii and E. D. Stotskaya	390 29
Questions of Functional Completeness for a Modification of Boolean Algebra —G. E. Tseitlin	400 39
On Checking whether a Sufficient Condition for Stochastic Automaton Stability Is Satisfied—B. S. Kochkarev	408 45
Some Subclases of Immediate-Constituent Grammars Which Are Weakly Equivalent to Context-Free Grammars—L. G. Samoilenko	411 48
On the Problem of Organizing the Disposition of Information Files on Magnetic Tapes—B. B. Timofeev and V. A. Litvinov	421 56
On the Convergence of α-Model Balancing Methods—V. G. Mishutin	427 62
Constructing Effective Methods of Solving Problems of Organizing Computational Processes on Computers—M. F. Kaspshitskaya and I. V. Sergienko	433 67
Random Search as a Means for Queueing Network Optimization—Z. I. Flikop	443 75
Duality of Infinite-Dimensional Linear Programming Problems and Some Related Matters—V. Temel't	447 80
A Problem in Linear Prediction for Homogeneous Stochastic Fields—Yu. D. Popov	456 88
Accuracy Analysis of Quadratic Programs—V. V. Ivanov and V. E. Truten'	464 94
On the Minimum Transport Time Subject to Additional Restrictions—V. A. Evstigneev	478 106
Minimax Criterion and Some Applications in Optimal Control Problems—A. I. Sotskov	483 110
On Uniqueness of the Solution of (n−1)-Games—O. N. Bondareva	492 118
An Approach to the Heuristic Aspect of Algebraic Transformations—V. G. Bodnarchuk and G. A. Gvedashvili	498 122
Automatic Information Dissemination Systems: Their Purposes, Characteristics, and Basic Specifications—A. A. Stognii and N. G. Zaitsev	501 124
The Relationship between Categorial and Domination Grammars. I—M. I. Beletskii	506 129
Preparation for the Study of Cybernetics—V. N. Kasatkin	513 136
BRIEF COMMUNICATIONS	
On Coding the Internal States of a Finite Automaton—A. Akhmetkaziev	517 140
The Synthesis of Cryotronic Circuits—A. P. Kochur and G. A. Mikhailov	519 141
Optimal Processing of the Results of (Discrete Time) Measurements—E. N. Chukreev	521 142
A Limit Theorem for Semi-Markov Processes—V. S. Korolyuk, L. I. Polishchuk, and A. A. Tomusyak	524 144
A Transformation of the Generalized Erlang Formulas—P. I. Zhuk	527 146
ABSTRACTS	
The Structure of a Modified Post Algebra and Its Properties—G. E. Tseitlin	530 148

CYBERNETICS

A translation of *Kibernetika*

Translation published December, 1972

Volume 5, Number 5 September-October, 1969

CONTENTS

	Eng./Russ.	
Galois Theory for Post Algebras. II.—V. G. Bodnarchuk, L. A. Kaluzhnin, V. N. Kotov, and B. A. Romov	531	1
Relationship between Categorial and Domination Grammars. II.— M. I. Beletskii	540	10
Synthesizing a Finite Automaton from Its Experiment Set— M. A. Spivak	546	15
New Algorithms for Minimizing Weakly Defined Boolean Functions— A. D. Zakrevskii	553	21
Decomposition Method for Structural Synthesis of Finite Automata. I. — A. N. Melikhov, L. S. Bershtein, and N. G. Topol'skii	561	29
Shortened Representation of a Set of Points— M. Dombrowski	570	36
Some Restrictions on State Assignment for Asynchronous Control Units — E. L. Denisenko	575	40
Vector Coding— S. I. Khmel'nik	590	54
The Performance of Multiplication by Means of an Operation Unit Based on the Conveyor Principle of Data Processing— A. G. Kukharcheuk, G. M. Lutskii, and G. V. Reutov	595	58
The Automatic Preparation of Problems for Analog Computers— B. P. Bichaev	601	64
A Method of Synthesizing Combination Logical Circuits on a Computer — Ya. A. Khetagurov, V. V. Pervov, and I. V. Brusenkov	610	72
Some Properties of Arithmetic Cyclic Codes Which Correct Blocks of Errors — G. K. Kladov	616	78
Interpreted Languages and Interpreters— V. N. Red'ko	621	81
On the Planning of Search Experiments— M. K. Gavurin	630	90
Some Problems Relevant to Experiment Planning— V. B. Nevzorov	636	95
Sorting Algorithms with Minimum Memory— V. E. Alekseev	642	99
The Minimization of the Number of Passes Through the Original Array in External Sorting by Merging— L. I. Sholmov	649	104
The Stochastic Problem of Two Machines— V. Ya. Burdyuk	656	110
On a Problem of Linear Extrapolation of a Homogeneous Random Field over a Finite Region— Yu. D. Popov	662	115
Distribution of Loss-Cost Function in Inspection and Maintenance Problems — E. P. Lebedintseva	667	118
An Algorithm for Current Assessment of An Object Parameter— M. A. Lyaskovskaya	672	122
Determination of the Algebraic Polynomial of Best Approximation— V. N. Malozemov	676	125
On the Maximum Principle in Banach Space— Yu. M. Volin and G. M. Ostrovskii	683	132
A Model of Competitive Economic Equilibrium— V. L. Makarov	688	136
Functionals Defined on Subsets of Vertices of An N-Dimensional Unit Cube — V. K. Leont'ev	694	142
BRIEF COMMUNICATIONS		
A Cost Model for a Set of Duplicated Microcircuits— S. A. Strel'tsov and L. V. Matsevityi	701	147

CYBERNETICS

A translation of *Kibernetika*

Translation published December, 1972

Volume 5, Number 6 November-December, 1969

CONTENTS

	Eng./Russ.	
The Upper Complexity Bound of the Shortest Disjunctive Normal Forms of Almost All Boolean Functions—A. D. Korshunov	705	1
On the Choice of Method for the Computation of Flows in Nets on a Computer —M. G. Sukharev	716	9
Method of Constructing a Series of Additively Different Numbers—G. S. Aloyan and A. G. Timoshenko	719	12
[Report on the Algorithmic Language Algol 68—A. van Wijngaarden, B. J. Mailloux, J. E. L. Peck, and C. H. A. Koster		17]
ABSTRACTS		
Representation of Partial Boolean Functions—I. I. Brona	725	145
Decomposition of Partial Boolean Functions—I. I. Brona	726	145
SCIENTIFIC INFORMATION		
Seminar on "Graphs and Automata in Computer Settings. Homogeneous Integrating Structures"—V. I. Kekliya and I. V. Safonov	728	147
The 1971 IFIP Congress. Prospectus of Reports to be Presented	729	147
INDEX		

NOTE

This index lists all material that appears in the original Russian journal. Items originally published in English or generally available in the West are not included in the translation and are shown in brackets. Whenever possible, the English-language source containing the omitted items is given.

The Russian press date (podpisano k pechati) of this issue was 3/9/1970. Publication therefore did not occur prior to this date, but must be assumed to have taken place reasonably soon thereafter.
